

Technical Data Sheet

Methyl Cellulose

MC A30M

1 Description

MC A30M is high viscosity Methyl Cellulose (MC) which is designed for using in a wide range of food ingredient additives applications.

2 Physical Analysis

Appearance	:	White to slightly off-white fibrous or granular powder.
Identification A to E	:	Conform
Methoxy	:	27.5-31.5%
Solution appearance	:	Conform
Loss on drying	:	5.0% Max
Residue on ignition	:	1.5% Max
pH	:	5.0 - 8.0
Apparent viscosity, 2% solu., 20°C	:	30000-50000cps
Particle size	:	Min. 98% pass through 100 mesh

3 Heavy Metals

Heavy Metal	:	≤10ppm
Arsenic	:	≤3ppm
Lead	:	≤3ppm
Mercury	:	≤1ppm
Cadmium	:	≤1ppm

4 Micro bacteria

Total plate count	:	≤1000cfu/g
Yeast and Mould	:	≤100cfu/g
Coli form	:	Absent/g
Salmonella	:	Absent/g

5 Packaging

12.5kg fibre drum with inner liner.

6 Regulation

Meets all requirements of FCC,FSSC,E461 Methyl Cellulose.
